Foundations [®] KIT				Foundations [®] Class Packs			

Mayco's Foundations® Opaque Class Pack contains a complete palette for every color

need, due to the intermixing ability of the

glaze. Students will love the bright colors while

educators will enjoy the performance and

value price. Available in 4oz and pint packs.

FN-KIT3 Contains 12 – 4 oz jars, one each of the following colors. **FN-KT3P** Contains 12 pint bottles, one each of the following colors.

FN-001 White, FN-002 Yellow, FN-003 Orange, FN-004 Red, FN-005 Pink, FN-017 Purple, FN-018 Bright Blue, FN-019 Dark Blue, FN-007 Green, FN-020 Medium Green, FN-008 Brown, FN-009 Black

Foundations **Opaque, Sheer & Matte**

Fired Products

Foundations[®] Sheer & Matte

Begin your ceramic project with Foundations[®] as the surface. Available in gloss opaque, gloss translucent and matte finishes, Foundations[®] will become an essential building block. Foundations[®] Opague, Sheer and Matte glazes are easy to apply, consistent in firing performance and are budget friendly. Foundations[®] are stable and non-moving, excellent for majolica techniques with Stroke & Coat[®] and glaze combinations. Foundations[®] glazes dry quickly, allowing immediate additional decorating and same day firing. Easily apply to leather hard clay for time savings and same day firing. We do recommend leaving an area unglazed, such as the back or bottom of the piece, for out-gassing during firing.

Foundations[®] Opaque

Broad palette of 53 colors produce a beautiful, smooth, high-gloss finish and can be intermixed for custom colors. Most Foundations® Opaque glazes perform well at mid-range (cone 5/6). Refer to the Mid-Range Firing Guide on pages 51-52 for results. Certified AP Non-Toxic and food safe.

Foundations[®] Sheer

The soft, translucent gualities of Foundations® Sheer glazes add a tint of color to your work, allowing surface textures or design to show through. Certified AP Non-Toxic and food safe.

Foundations[®] Matte

For an opaque, matte finish, apply Foundations[®] Matte to wet or leatherhard clay and bisque for all over coverage or design work. While these colors will hold at higher firing temperatures, the matte surface will become more satin-like Certified AP Non-Toxic and food safe
